

MACHINE TOOLS MANUFACTURER  
INVENTORY OF SMALL PARTS USING A COUNTING SCALE

COUNTING SCALES | KERN CXB

The use of a counting scale is recommended for stocktaking of small parts. Manually counting the individual parts is very time-consuming and often error-prone, especially when it comes to large quantities of small parts. A counting scale allows for safe and error-minimizing stocktaking or verification in a fraction of the time that would be needed with conventional counting. This saves time and therefore costs

| Model                                                                                                                                   | Weighing capacity | Readability | Counting resolution | Price   |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------|-------------|---------------------|---------|
| CXB 30K2                                                                                                                                | 30000 g           | 2 g         | 15000               | € 350.- |
| <b>Suitable Accessories:</b> <ul style="list-style-type: none"><li>• DAkkS calibration certificate 963-128 - 963-128 - €124.-</li></ul> |                   |             |                     |         |
