BLOOD ANALYSIS WITH THE MICROSCOPE

TRANSMITTED LIGHT MICROSCOPES | KERN OBN-13

In a blood test, the distinguishing features of the blood cells that come to light must be clearly imaged in order to then be classified by the eye of the trained observer in daily routine. For assessment, the blood smear is examined under the microscope at a magnification of 1:40 or 1:100 sampled.

Model	Optical System	Tube	Eyepiece	Price
OBN 132	Infinity	Trinocular	Eyepiece HWF 10x / Ø 20mm with anti-fungus, high eye point	€ 1,680,-
