

PLASTIC INJECTION FOUNDRIES

MOISTURE CONTROL OF INJECTION MOLDING GRANULATE IN INCOMING GOODS

MOISTURE ANALYSER | KERN DBS

When it comes to plastic injection molding, the perfect condition of the granulate plays an important role. For this reason, the granulate is checked for moisture when it arrives at the goods receiving point. This check ensures that the injection molding process can run without errors and that rejects, such as streaks, are avoided.

Model	Weighing capacity	Readability	Price
DBS 60-3	60 g	0.001 g	€ 1,650.-
