

OLD BUILDING RESTORATION COMPANIES
EXAMINING ASBESTOS UNDER THE MICROSCOPE

TRANSMITTED LIGHT MICROSCOPES | KERN OBN-15

During renovation work, it is advisable to carry out a microscopic examination of any asbestos insulation. The visual analysis of the asbestos fiber image (morphology, birefringence, signs of elongation, scattering, etc.) is carried out under the phase contrast microscope. The investigation and clarification releases you from any liability and financial consequential damage.

| Model | Optical System | Tube | Eyepiece | Price |
|---------|----------------|------------|---|-----------|
| OBN 159 | Infinity | Trinocular | Eyepiece HWF 10x / Ø 20mm with anti-fungus, high eye point | € 2,990.- |
