ASSESSMENT OF VITAL BLOOD USING DARK FIELD MICROSCOPY

TRANSMITTED LIGHT MICROSCOPES | KERN OBN-15

Dark field microscopy examines the appearance, activity and functionality of vital blood, especially red blood cells (erythrocytes), but also leukocytes and other structures in the blood. This examination can provide usable results and contributes to making a diagnosis.

| Model | Optical System | Tube | Eyepiece | Price |
|---------|----------------|------------|---|-----------|
| OBN 158 | Infinity | Trinocular | Eyepiece HWF 10x / Ø 20mm with anti-fungus, high eye point | € 2,970.- |
