

LIME WORKS

MOISTURE CONTROL OF A QUICKLIME MIXTURE

MOISTURE ANALYSER | KERN DAB

When producing sand-lime bricks, the moisture content of the lime-sand mixture should be 6%-8% so that the firing process can run smoothly. Control with a moisture meter is essential to avoid rejects and to ensure the building quality of the bricks.

Model	Weighing capacity	Readability	Price
DAB 200-2	200 g	0.01 g	€ 1,200.-
