

## THERMOTECHNOLOGY MEASURING THE MATERIAL THICKNESS OF HEAT PIPES

## MATERIAL THICKNESS GAUGES | KERN TN

Since a change in state occurs in heat pipes when the liquid is heated, which leads to an immediate change in pressure, the heat pipe can explode if the critical pressure is exceeded, especially in worn pipes. To be on the safe side, the thickness of the pipe material should therefore be checked regularly.

Model	Max. Pulse-Echo	Price
TN 230-0.01US	230 mm	€ 700

## **Suitable Accessories:**

• Factory calibration certificate 961-113 - 961-113 - €167.-
