

MANUFACTURING OF SENSORS
WEIGHING SMALL AMOUNTS OF CASTING COMPOUND

PRECISION BALANCES | KERN PCB

In electronics manufacturing, potting compounds are important for protection against vibration or similar. A precision scale is used to weigh the small amounts of these potting compounds required. Since very small amounts of resin require relatively longer curing times, it is important to use the potting compound suitable for this purpose and to weigh it precisely so that it can fulfill its function.

Model	Weighing capacity	Readability	Weighing surface (d)	Price
PCB 2000-1	2000 g	0.1 g	130×130 mm	€ 230.-
Suitable Accessories: <ul style="list-style-type: none">• DAkkS calibration certificate 963-127 - 963-127 - €103.-
