

MILL AND GRINDING OPERATIONS  
WEIGHING A FLOUR SAMPLE IN THE LABORATORY FOR EXAMINATION

PRECISION BALANCES | KERN PCJ

Large milling companies have a laboratory for testing and improving their flour. A precision balance is used to measure a flour sample in the laboratory. It is important that the sample quantity is weighed very precisely, otherwise no informative sample results will be achieved.

Model	Weighing capacity	Readability	Weighing surface (d)	Price
PCJ 6000-1M	6000 g	0.1 g	150×170 mm	€ 440.-
<b>Suitable Accessories:</b> <ul style="list-style-type: none"><li>• DAkkS calibration certificate 963-128 - 963-128 - €124.-</li></ul>
