

**AUTOMOBILE MANUFACTURING SERVICE AND SUB-MANUFACTURING
VISUAL INSPECTION DURING THE PRODUCTION OF SEAT BELTS WITH A MICROSCOPE**

TRANSMITTED LIGHT MICROSCOPES | KERN OBN-S

In order to check the correct installation of, for example, the spring and the locking mechanism of safety belt systems during production, a microscope is positioned with a very high working distance to check the work process, e.g. whether the locking mechanisms are closed correctly and deep enough. Important for the safety guarantee.

Model	Optical System	Tube	Eyepiece	Price
OBN 135T241	Infinity	Trinocular		€ 2690.-
