

MANUFACTURING OF SENSORS
CONTROLLED WEIGHING OF A PRECISELY DEFINED AMOUNT OF CASTING COMPOUND

PRECISION BALANCES | KERN PCJ

In electronic assembly manufacturing, potting compound is a flowable sealing compound made from bitumen, resins, and waxes, among other materials. A specific amount of this potting compound must have a precisely defined weight. This is verified in the laboratory using precision scales. This control process is important to ensure the potting compound's functionality.

Model	Weighing capacity	Readability	Weighing surface (d)	Price
PCJ 600-2M	600 g	0.01 g	131×131 mm	€ 420.-
Suitable Accessories: <ul style="list-style-type: none">• DAkkS calibration certificate 963-127 - 963-127 - €103.-
