

INSTITUTES FOR ARCHITECTURE AND CONSTRUCTION ENGINEERING  
WEIGHING CONCRETE COMPONENTS IN THE LABORATORY TO DEVELOP A NEW, PRECISELY DEFINED MIXT

PRECISION BALANCES | KERN PCB

To mix a sample concrete in the laboratory, the various components (silicate fume, glass, fibers, or PCE (superplasticizer)) are precisely weighed using a scale. Precise handling is essential to ensure the concrete meets the required properties. This also prevents potential complaints or claims for damages due to incorrect concrete mixing.

Model	Weighing capacity	Readability	Weighing surface (d)	Price
PCB 6000-1	6000 g	0.1 g	150×170 mm	€ 250.-
<b>Suitable Accessories:</b> <ul style="list-style-type: none"><li>• DAkkS calibration certificate 963-128 - 963-128 - €124.-</li></ul>
