

CATS BREEDING  
WEIGHING THE AMOUNT OF FOOD FOR A KITTEN DURING HAND-REARING

BABY BALANCES | KERN MBC

When hand-rearing a kitten, portioning the food is particularly important. The amount of food increases continuously with the kitten's age. Therefore, the food is weighed very precisely according to the kitten's stage of development. This is important for its development and provides information about whether the portioning is appropriate.

Model	Weighing capacity	Readability	Verification value (e)	Price
MBC 15K2DEM	6 kg; 15 kg	0.002 kg; 0.005 kg	0.002 kg; 0.005 kg	€ 370.-
