

RAIFFEISEN AGRICULTURAL PRODUCTS WHOLESAL
WEIGHING A SMALL AMOUNT OF RAPESEED FOR A TEST CULTIVATION

PRECISION BALANCES | KERN PCB

In agriculture, analyzing climate risks, adapting farming practices, and optimizing crops are important factors in intelligent land use. To test a suitable crop, seeds, such as rapeseed, are weighed for sowing. Since the cultivation area is small (10-20 square meters), approximately 4,000 seeds are sufficient. The rapeseed seeds are very small and the quantity corresponds to a very low weight. Therefore, a precision scale is used for weighing.

Model	Weighing capacity	Readability	Weighing surface (d)	Price
PCB 3000-2	3600 g	0.01 g	130×130 mm	€ 310.-
Suitable Accessories: <ul style="list-style-type: none">• DAkkS calibration certificate 963-127 - 963-127 - €103.-
