

SAILBOATS MANUFACTURER  
CHECK WEIGHING OF A SAILING BOAT USING A HANGING SCALE

HANGING BALANCES | KERN HCB

Experience in boat building guarantees the required total weight after completion of a boat or a dinghy. Nevertheless, the boat must be weighed to check it on delivery or before a regatta. The boat is pulled up with a rope on a hook that is attached to the center of the boat. Suspended scales are interposed between the rope and the crane. The weight, approximately 400kg or more, can be read off

Model	Weighing capacity	Readability	Net weight	Price
HCB 1T-3	1000 kg	2 kg	0.57 kg	€ 265.-
<b>Suitable Accessories:</b> <ul style="list-style-type: none"><li>● Adjustment at the location of installation 961-250 (Not in combination with verification) - 961-250 - €99.-</li></ul>
