

HANGING BALANCES | KERN HCB

A certain additional weight with e-bikes through useful extras such as full suspension, double battery system or ABS is well invested. With the bike frame, however, you can save quite a bit of weight. It often offers a housing for the integrated battery and is therefore often hollow and made of carbon on e-bikes. When developing the design, the frame is often weighed in a controlling manner. This quick and uncomplicated weighing is best done with a hanging scale

Model	Weighing capacity	Readability	Net weight	Price
HCB 50K20	50 kg	0.02 kg	0.262 kg	€ 125.-
Suitable Accessories: <ul style="list-style-type: none">• DAKkS calibration certificate 963-128H - 963-128H - €124.-
