

ZOOLOGICAL GARDENS
CONTROLLED WEIGHING OF ANIMALS IN THE ZOO

PLATFORM SCALES | KERN EOS

Regular weight control of the animals is essential in zoological gardens. She can give the veterinarian information about illnesses or poor growth of the animal. It also helps him calculate the dose of medication. Medium-sized animals such as monkeys, ungulates or large birds are weighed with a parcel scale. The weight recording in young animals also serves as a progress control for the health and good development of the young animal. The zoo veterinarians train their own weight to estimate their weight

Model	Weighing capacity	Readability	Price
EOS 300K100XL	300 kg	0.1 kg	€ 470,-
Suitable Accessories: <ul style="list-style-type: none">• DAkkS calibration certificate 963-129 - 963-129 - €153,-
