

QUALIFIED SOIL IMPROVEMENT
BULLET-POINT CONTROL OF THE FILLING PROCESS OF SOIL IMPROVERS SUCH AS FERTILIZERS, PESTICIDES OR GROWTH AIDS

COUNTING SCALES | KERN SXS

In the field of soil improvement, the developed products such as fertilizers, pesticides or growth aids are packaged in containers of 750-2500g. In-process control of the filling process, i.e. ensuring an exact filling quantity during portioning, is essential. Due to the ongoing check-point-like control, any necessary readjustment can be carried out quickly and overfills and underfills are avoided. This quality control is essential and generates customer satisfaction

| Model | Weighing capacity | Readability | Counting resolution | Price |
|--|-------------------|--------------------|---------------------|-----------|
| SXS 10K-3M | 6 kg; 15 kg | 0.002 kg; 0.005 kg | 30000 | € 1,350.- |
| Suitable Accessories: <ul style="list-style-type: none">• Verification / Conformity assessment according to NAWI (2014/31/EU) 965-228 - 965-228 - €84.- | | | | |
