

VETERINARIANS IN SLAUGHTERHOUSES, MEAT INSPECTION
MEAT INSPECTION FOR PARASITES, FUNGI, ETC. WITH A MICROSCOPE

TRANSMITTED LIGHT MICROSCOPES | KERN OBE-13

Microscopic analysis methods are also important in the so-called meat inspection. Especially when it comes to food hygiene meat examinations for worms, parasites or fungi. A microscope with a 40-100x magnification is typically used for this in order to be able to carry out an optimal analysis in order to protect animals and humans

| Model | Optical System | Tube | Eyepiece | Price |
|---------|----------------|-----------|---|---------|
| OBE 132 | Finite | Binocular | Eyepiece HWF 10x / Ø 18mm with anti-fungus, high eye point | € 640.- |
