WEIGHING INGREDIENTS (WATER, HONEY, SUGAR) FOR A SYRUP

PLATFORM SCALES | KERN IOC

Larger batches are produced when creams, teas or juices are produced in a pharmacy. The basis for a sleeping juice, for example, is a syrup. The ingredients for this (water, honey, sugar) are precisely weighed with an industrial scale. For weighing the active substance (passion flower, hops, lemon balm, etc.) a precision scale is used. Strict adherence to the recipe is important for a perfect product and for customer satisfaction
